

# HALLOWEEN LUMINARIES

## SUPPLIES

1 package of orange paper bags  
(can be found at the party store)

scissors

glue or tape

sand  
(you can also use beans or rice)

tealights

## OPTIONAL SUPPLIES

mason jars

paint

## INSTRUCTIONS

1. Choose which designs and faces you'd like to put on your luminaries and use scissors to cut them out.
2. Arrange the designs on the paper bag how you want them and use the tape/glue to secure them in place. You can secure your designs on the inside or on the outside of the bag depending on if you'd like to see the faces during the day, or only at night.
3. After the designs are secure, open your bags and put 1/2 cup to 1 cup of sand into the bottom of each paper bag.
4. Place your tealight into the sand, light it up and enjoy your homemade luminaries!

### **Optional Instructions:**

- Paint mason jars different colors and secure your designs to the outside of the jar instead of using paper bags.
- Use the cut outs as templates and trace the faces/designs you'd like to use onto black paper. Cut these out and use them on the outside of your bags or mason jars for a spookier look!
